Visit "[Failed Mutation](#)" on MotoLyrics.com

Highly contagious strain hastens the coming end
Impending collapse at hand
Purifying pests come down in swarms
Widening wave of death of unrelenting apocalypse
Taste the scourge immaculate

Lost cause, mankind atrophied
To another failed mutation
Wiped out, perished from the earth
Subject to extermination

Vain repentance, no one can be spared
As churning heat splits apart the land
Predestined to rot, the only valid truth

No tribulation no rapture
Just cold nothingness of cold non - existence

Sleepwalking through life
This human waste must die
The end of parasitic overlords' reign
Clouds of ash be the sole
Soaring reminder of this world

Lost cause, mankind atrophied
To another failed mutation
Wiped out, perished from the earth
Subject to extermination
