The thunder of the panzers ready to strike  
Echoes of warfare haunting the night  
Fire and bullets rain death from the skies  
Living to fight, fighting to die...

Thundering legions - signals your doom  
Turning this world into a tomb  
Thundering legions - extinguish the light  
Thundering legions - it's time to fight - tonight!

The crush of death metal drives you insane  
The deafening roar that you'll hear as you're slain  
Hell's thunderous steel crushes the ground where  
You stood ironclad warfiend hungry for blood...

Thundering legions - heard 'cross the land  
Through infernal crossfire hear death's command  
Thundering legions - it's here - it's all that is left  
When metal comes pounding, you'll fight to the death!

The heavens now fall, dying in flames  
Shudder in fear when we call out your name  
The unholy power that sets fire to the sky  
And the last thing you'll hear before you die is...

Thundering legions - signals your doom  
Turning this world into a tomb  
Thundering legions - extinguish the light  
Thundering legions - it's time to fight for...  
Thundering legions - heard 'cross the land  
Through infernal crossfire hear death's command  
Thundering legions - it's here - it's all that is left  
When metal comes pounding, you'll fight to the death!
