So the story goes
I am wading here for you
And maybe that's not right
But it's all that's left to do
Cause I'm falling
Through this melody
If only you could catch me take me save me
What am I to do with all my sorrow
What am I supposed to do, tell me what the hell to do
It's hard to take the promise of tomorrow
Every moment comes to soon
If I could throw mine all away
Then I'd have the strength to face
Your sorrow, too
Don't look at me like that
Cause you know that I will break (down)
Cause I can see that you're at the edge and it's not
safe
To be falling through my melody
Cause baby I can't catch you, take you save us
If you I could catch you take you save us
