The names have been changed to protect the innocent.
This is poison.
Manufactured for the general well being of the
community.
You can kill what you can't see.
What can't be seen can't possibly exist.
Life uninterrupted, undecided, unanticipated.
Manufactured for the general well being of the
community.
You can't kill what you can't see.
What can't be seen can't possibly exist.
You call this worldwide destruction?
I call it a mediocre excuse to force-feed pollution as a
problem.
Colonize, monopolize, and destroy.
Compared to actual existence, this is child's play.
Screaming for an answer you're never going to get.
This is poison, this is battery acid.
Lies, lies, lies..
