VERSE 1:

Reach out today
Feels like you've always got the best of me
I wanted to give you something more than this
This Is just a secondary option for me
To dive In, Let's dive In.
Let's go to the end of where we all begin

CHORUS:

This Is just a wake up call
Hear me when I scream
I wanna live forever you just wanna live today
Together several days
But now we're going seperate ways

VERSE 2:

I lied to you
We went far too long
Can you believe that I wanted to carry your pain?
I still remember what happened to us that day
When all the suffering and pain was long gone away

CHORUS:

This Is just a wake up call
Hear me when I scream
I wanna live forever you just wanna live today
Together several days
But now we're going seperate ways
