Young people young minds for fuckin daily fishy

Piggie pick it up, pick it up
Your acorn
Remember you need us you need us
Like the water needs the glass

You seem to be such talented guy

You break the barrier of respect
Day after day you grow fat your pockets
You shark in jacket
Putting puppets in the balance, joker

You know by the way we're all running through bad

The deal can be fixed but this implies pliability

Piggie pick it up, pick it up

Putting puppets in the balance, joker

If you look back, just your heels stand
Enjoy the trip your touring existence

If you walk on, you'll meet yourself already

You break the barrier of respect
Day after day you grow fat your pockets
You shark in jacket
Previously uncertain, now precariously ensured
Putting puppets in the balance
You break the barrier of respect
Day after day you fat your pockets
You shark in jacket
Putting puppets in the balance, joker

6. Infinite Dump System Circle

Your kind of life is

Portrait of new damage desire

Design of world blinded by illusion

Winners are wick and you are the maker of this crime

Come out come out come out and let me see your face

This time you wont desert you'll be forced to do and
you'll be forced to say

Try to link your mind with your mouth up

You're like a hang jury!

My friend believe me don't face every difficulty

You will encourage with our promises

Oh here's your fault

You think (you think) the shortest way to win in your life
is now the better one

Oh no my dear, you'll slip on your fear

Like a crump that now it's ready to explode

And you are waiting for the verdict of guilty

But now I find you behind a good-face mask

Come out come out come out and let me watch your
skin
