"Raise Your Weapon"

Visit "[Raise Your Weapon](#)" on MotoLyrics.com

Belief is a blessing, and I believe in myself
It's gotta count for nothing

Why won't they, just give me the shine I deserve
Been held the flame all of my life I believe it's time for
the burn

Don't worry about me, I appreciate your time for
concern

But all I need is my birds, you see the flock you learn
I'm ,hopping above you, no one is starting to bug you
Harder than high for these rappers that you bastards
look up to

I know, and to be honest, you ain't telling them nothing
Came out the room with no room to grow
Young bejamin button, I'm hungry, my stomach's
growling

I want it, I want it, now and I'm guessing I'm on my own
Since the won't help a brother out, man but it's cool
though

See I'ma let em roam with they assumptions
Cause I know they'll feel like something,
when they'll see me with a huge blow

When I'm in love with 2 shows, my album sells like who
knows

Then when I'll die, , I told you so on my tombstone, just
to be real

And trust me we will, make em surrender when we
raise up our weapons

Won't let em forget it, oh no

Raise your weapon, raise your weapon, raise your
weapon

Raise your weapon, raise your weapon, raise your
weapon

,and it's over

Young boy, young dreams, sick of that feeling of what
not getting love brings

And myself, I'm a strict believer, I'm gonna get money
I'm gonna sell out them big arenas, just watch me I
know it

No I'm not cocky, I'm focused

Eminem said you only get one shot, don't blow it, and I

won't
Shady my word is bon, now flocks of my birds is gone
Cross my heart and hope to die, that's word to mom
Do you know how it feels to know that you'll never be
more than hope
Oh, neither do I, I'm success in a form of dope
I just be, smoked yet, don't let them light me up
Cause for everything I care about, you on death like the
drug
You just might get addicted, I just might get convicted
Making us fight the brief, like living life is religion
Ah, this is war, I'm going out to everybody
Making sure that they know what it is, right
Every time we

Raise your weapon, raise your weapon, raise your
weapon
Raise your weapon, raise your weapon, raise your
weapon
,and it's over.
