feat. Clipse

(Malice)

What we had was a thing of the past
And I recall showering you with gifts, you never had to ask
Thought love was real
Damn near gave you my last, bracelets with the karats
Purchasing class, that was me
Now you're alone and empty, bitter
To put it simply, I know you miss me
And that must be a hard pill to swallow
I feel for your man, I'm a hard act to follow

How I find the time to think of what we had before
When everybody I know in dancing on the floe
Since you left the time has been so slow
Well, let it come out of my mind, where else can it go

(bridge)

See I need you boy
I honestly feel I can't bare my health
See I need you boy
That's probably why I dance with myself

(chorus)

You're my star (my star)
Far, True or near how you shine (ooh)
So no matter how far (no matter how far you go)
I'm dancing with you in my mind (yeah, yeah)

Baby its cool with me, you left, ran off with friends
I bet I know it won't be long until its on again
We got harmony to every note
We can palm a physic if you like, whatever floats ya'
boat

(bridge)

See I need you boy (mmm)
I honestly feel I can't bare my health
See I need you boy (yeah)

That's probably why I dance with myself (you)

(chorus)

You're my star (my shining' star)

Far, true or near, how you shine

So no matter how far

I'm dancing with you in my mind

Baby, we used to walk and talk (talk)

And you would hold my hand (hand)

And by the time we finished talkin'(talkin')

We were learnin' how to plan

And I can't wait till we move together

Again

Ah, baby

I want you so much

Its I
