Ey ey

Well done, welcome to the city
You'll become number one
With a witty tongue
We praise the young
Have a ball, have it all, do whatever
Hit the wall, get the call
And you better pay
There's no other way

Throw your pennies
In a wishing well
Might get heaven
And you might get hell
Thunder, lightning
Ain't that kinda frightening

Saints and sinners
On the road to fame
Ain't no winner
'Til we know your name
Black white, flashlight
Show me what you got

Have a good bite out of the city
Take a long cold look at the world
You might crash, burn
Either way you'll learn
Good bite out of the city

(Ahh, ahh, ahh)

Free your mind, your behind's gonna follow
Do the crime, do the time
When tomorrow comes
We're the pretty ones
Shop around, settle down, get a job, be a slob
What you get, what you give's
Your prerogative
That's how we live

Throw your pennies
In a wishing well
Might get heaven
And you might get hell
Black white, flashlight
Show me what you got

Have a good bite out of the city
Take a long cold look at the world
You might crash, burn
Either way you'll learn
Good bite out of the city

The way you want it or won't, yeah
Yeah, yeah

Show and prove, do or die
We don't sleep, we don't cry
No no, we don't cry
Hit 'em low, hit 'em high
Take an eye for an eye

Yeah!

Have a good bite out of the city
Take a long cold look at the world
(Oh yeah)
You might crash, you might burn
Either way you'll learn
Good bite out of the city

(Have a good bite out of the city)
Have a good bite
Take a long cold look at the world
You might crash, burn
Either way you'll learn
Good bite out of the city
