

Acres, The "Dirty Little Secret"

Visit "[Dirty Little Secret](#)" on [MotoLyrics.com](#)

You could've sat down next to anyone in the room
You chose a chair next to mine
Your friends don't have to know if we quietly get up
and go
Let's take a walk outside

Come on meet me under the open sky
I want to find out what you look like in the moonlight
And if I have to be your dirty little secret, darlin'
That's alright, that's alright with me
Well, that's alright with me

Do what makes you feel like you're alive
Take a leap of faith and dive, leave the rest up to fate
I'll be the dream you keep, your very own conspiracy
I'll never give you away

Come on meet me under the open sky
I want to find out what you look like in the moonlight
And if I have to be your dirty little secret, darlin'
That's alright, that's alright with me

You and I, come on baby, you can change my life

Come on, come on, come on... let's go out side
Come on, come on, come on... change my life
Come on, come on, come on... let's go out side
Come on, come on, come on... change my life

Why don't you meet me under the open sky
I want to find out what you look like in the moonlight
And if I have to be your dirty little secret, darlin'
That's alright, that's alright with me
Yeah, that's alright with me
Yeah, that's alright, that's alright with me
