Feel the war inside
Your problems are enough to recognize
Your life is rotted and dry
Forgotten feelings emerge from your cry

Feel the war inside
Your conscience has been sold for a piece of time
I see through all those smiles
Future is a great lie that controls your own desires

All the freedom meanings drag immoral sounds
Raise your voice, increase the noise of underground

Feel the war inside
No god can take our souls or save us all
They want to rip us off
"behave, obey and be a slave for us"

Feel the war inside
Politicians are killers of our minds
Ignore that System knows
Democracy is a legal hand that's pressing on your
mouth

Call the freedom meanings drag immoral sounds
Raise your voice, increase the noise of underground
