Everybody, get together  
Listen to me, and I'll hear you  
Shaded by the same umbrella  
Smile about the way that we do

I can see around the world  
Let's dance around in circles  
Every boy and every girl  
Hands in the middle  
Let's dance around in circles

Everybody, we got to work together  
Got to get this thing off the ground  
Spirit flows, forget the weather  
I believe we can turn it around

Me and you got to stay together  
I got to have you here at my side  
Besides, who's gonna feed our big gorilla?  
Who's gonna wipe the tears from your eyes?

Hands in the circle, feel the sound  
In the circle, dance around
