Synthesize me
Make me your
Love and hate machine
And I can serve you better

Start the true
Emotion scheme
Till I'm no longer forced
To keep my vital functions

Synthesize me
And reboot
I need to start again
I need to make it different

All unguarded
All without
The will to play along
Benumb its futile feelers

I'm half
Alive
My skin's
Intact
I'm only staring at... the blade

Synthesize me
Wash away
The trash I'm piling on
To mesmerize the moment

I'll drop the needle
My settings work
No stunted interactions
No doubts, no paranoia
