Thinking about the last couple back
About all the things I could've changed
If I didn't drop out what would that be about
And would I have ended up just like one of them
Looking back on all of that
I never that'd be a suit that fit me for that long
On the other hand I never thought that
Whatever I see could really suit me for that long
And then I went away for so long
All they would say was so long
And knowing that after the fact
I still messed things up with people who had been there
for song
They'd always say you've been for so long
You shouldn't have waited so long
I've been astray for so long
To even commit to this song
But it is what it is
It is what it is

I've been away for so long
Since they would say so long
I've been astray for too long
Since I've been singing these songs
I can't wait I can't wait I can't wait for tomorrow
Until then it is what it is
I can't wait I can't wait I can't wait for tomorrow
Until then it is what it is
