You make this world a better place  
When you try your best each day  
Just listen and your heart will show the way

It will make you strong inside  
Everytime you do what's right  
In a time of darkness you'll find light

You'll find you have the courage within  
(Courage within)  
To fight for what you truly do believe in

With all your heart  
I know you can do anything  
With a little faith you can reach right up to  
The highest star

There's no mountain you can't climb  
Just look inside your heart you'll find  
The strength inside  
All you have to do is try  
With all your heart

There's a difference you can make  
So never underestimate  
The power of what one can really do  
Nothing's going stand in your way  
(Nothing's gonna stand in your way)  
Cause now you know you've got what it takes  
To save the day

With all your heart  
I know you can do anything  
With a little faith you can reach right up to  
The highest star

There's no mountain you can't climb  
Just look inside your heart you'll find  
The strength inside  
All you have to do is try  
With all your heart

If you start to stumble  
And if you start to fall  
(If you start to fall)  
Just keep reaching for your dreams  
And know you're going to catch them all

With all your heart  
(With all your heart)  
You know you can do anything  
With a little faith you can reach right up to  
The highest star

There's no mountain you can't climb  
Just look inside your heart you'll find  
The strength inside  
All you have to do is try  
With all your heart

All your heart  
(All your heart)  
With all your heart
