Enslaved by your beauty  
Enslaved by your touch  
Enslaved by this feeling  
That tempts me too much

So pick your poison  
And choose your passion's price  
Forever drowning  
In these endless escapes

So let go and fly  
As we let go and die

When you love the one you hate  
That sadist is your soulmate  
When you love the one you hate

Trapped in this torture  
Used to these tears  
Forever are our games  
The drama's all the same

Hiding a double life  
You deny your death

So let go and fly  
As we let go and die

When you love the one you hate  
That sadist is your soulmate  
When you love the one you hate
