[MAN:]

Honey, I'm home!  
Would you come here and look at this?  
There's something funny up in the sky!  
Is it a bird? Is it a plane?  
Honey, look it's your doom!

The Sky is falling [x4]

Here comes Planet X!

The Mayan and the Hopi  
Foretold it would come  
The axis shift revealing  
The Second Sun  
It's time to face yourself  
And all that you've done  
And not done  
Nibiru's on it's way  
There's nowhere to run

The Sky is falling [x4]

Flyby, shift,  
The earth and many were lost  
The powers of the world  
Would just wanna last goodbye  
The Family did survive  
And took its first breath  
Building our new world  
We start once again

The Sky is falling [x4]

[WOMAN:]

Planet X is the force, needed to finally break the  
absolute control, that this hidden, reptilian race, has  
had over Earth since they won a battle in space,  
thousands of years ago.

Gaia was dying

But now she can  
Show us her face  
Darkness has left  
Information  
Will reign in its place  
The gods hidden help  
That the children  
Could play on the beach  
Five thousand, one hundred  
Twenty five more years  
To teach, and learn

[MAN:]  
Honey, I'm home!  
Come out here and take a look at this thing.  
There's something funny up in the sky.

The Sky is falling [x4]

[WOMAN:]  
Planet X is incoming, and we're gonna have a global  
panic, but I and, others who have been understanding  
what I've been learning, are gonna jump for joy. I am  
going to be so happy, to see that planet. Does that  
sound crazy?
