What's the world biggest secret
Yeah, dropin' to wreck a metaphysics
The original hip-hop witch doctor
The torch is passed from one hand to the other
But the fire light illuminates the night
Mystic knowledge of the ancient Kampala
The holy grail of the templar knights
You realize that knowledge is power
That power to watch your enemies die
So back up I put a spell on you
I got the power cause my mamma never raised no fool

White collars and black magic in the halls of congress
from Rome to the pyramids
White collars and black magic from Spain to Paris to
the triangles of Egypt
White collars and black magic from Bohemian grove to
the throne of England
White collars and black magic if you got the power I got
to have it

Let's start the rebellion
Yeah, broadcast from Middle Earth
Uh, uh, and we will never surrender
Four thousand years in the making
And now the wisdom is there for the taking
The inner circle is destined to die
The truth is eternal the lights can't survive
Those with lives must read the signs
And symbols that hide yet reveal at the same time
Stay blind I got a job to do
I got the power cause my mamma never raised no fool

White collars and black magic in the halls of congress
from Rome to the pyramids
White collars and black magic from Spain to Paris to
the triangles of Egypt
White collars and black magic from Bohemian grove to
the throne of England
White collars and black magic if you got the power I got
to have it

Yeah somebody say woo woo
Say Hahaha
Say we want the knowledge
Say we want the truth

hahaha yeah
I like it I like it
The ones that dance are thought to be insane
You get it
By those who can not hear the music play
Now you hear it
The ones that dance are thought to be insane
You get it
By those who can not hear the music play
Now you hear it

White collars and black magic in the halls of congress
from Rome to the pyramids
White collars and black magic from Spain to Paris to
the triangles of Egypt
White collars and black magic from Bohemian grove to
the throne of England
White collars and black magic if you got the power I got
to have it

Give it to me, give it to me, give it to me
