I don't care what your man is sayin', he don't know what
it's all about
He says one thing when you're lookin' and another
when you turn around
Don't get caught up in emotion and how good it used to
be
Just remember there's a reason, that's the way it has to
be

Chorus:

Now don't you believe him, just take this advice
And don't look for rainbows in a fool's paradise

High up on a distant mountain, he sits lookin' down on
you and me
Says it doesn't really matter to him, he knows how it's
got to be
See it in his way or forget it, he don't need to come
around
Anytime he's got the feelin', he knows that he's got the
sound

(chorus)

(Solo)

I don't care what the man is sayin', he don't know what
it's all about
He says one thing when you're lookin' and another
when you turn around
Don't get caught up in emotion and how good it used to
be
Just remember there's a reason, that's the way it has to
be

(chorus)

No you just can't believe him, so take this advice
And don't look for rainbows in a fool's paradise
