Home is where your heart comes from  
But what do you do when your heart's gone  
With everything you need?

You got your stuff you packed your bags  
You checked your things made sure you had  
Everything you need

You upped, you left, you went away  
To love to fight another day  
'gainst everything you need

Laa daa day laa daa day laa daa day laa daa day

You severed your ties  
Left us all behind  
You said all your goodbyes  
To everything you need  
You severed your ties  
Re-forged them make it right  
Come back with open eyes  
To everything you need

'cause moments they can turn to dreams  
And hopes and wants can sometimes seem  
Like everything you need  
But treated bad then left alone  
You cried, we said to come back home  
To everything you need

Laa daa day laa daa day laa daa day laa daa day

You severed your ties  
Left us all behind  
You said all your goodbyes  
To everything you need  
You severed your ties  
Re-forged them make it right  
Come back with open eyes  
To everything you need
