On the eternal path of suicide  
Break the chains of life  
Endless wandering into nothingness  
The pride of ending life

Without emotions, without fear  
The only truth, a glorious dead  
Lead my hands, the cleaning knife  
Free me from this plague called life

The words of christ, treat with scorn  
To become the great abomination  
Walk the way of perished life  
Erase the stench of all living

The lights disappear  
Endless blackness around me  
I walk my own path  
The path of self destruction
