Yesterday or the day before?
Definitely yes
Yes, the day before
On both of those, it occurred to me
That I might already be dead

Dead and yet,
I'm awake it seems
I'm awake, and stuck in extended dream
Like life, like light
Like days, like nights
That I spend moving nothing but still

And I might be dead, (I could be dead)
But I could be wrong
And I might be dead,
But I could just be wrong

Wake me please so
I can see it's
Only a dream
Only another dream
Wake me please so
I can see it's
Only a dream
Only another dream away

Yesterday or the day before?
Definitely yes
Yes, the day before
On both of those, it occurred to me
That I might already be dead

There's a worn spot here
On my sneaker toe
From kicking your
From kicking your door
And I still can't get
An answer from that hard cold cyclops eye

And I might be dead, (I could be dead)

But i could be wrong
And i might be dead,
But i could just be wrong

Wake me please so
I can see it's
Only a dream
Only another dream
Wake me please so
I can see it's
Only a dream
Only another dream away

Wake me please so
I can see it's
Only a dream
Only another dream
Wake me please so
I can see it's
Only a dream
Only another dream away
Away... away...

And i might be dead,
But i could be wrong (i could be wrong)
And i might be dead,
But i could just be wrong

Wake me please so
I can see it's
Only a dream
Only another dream
Wake me please so
I can see it's
Only a dream
Only another dream away

Only a dream
Only another dream away
Only a dream
Only another dream
