Overheard your converstaoin  
Tonight I'm not satisfied  
Sitting here I realize  
That I always think I'm right

So it's over for all of you  
So it's over for all of you

My scenery is lakes and trees  
I just can't keep all concrete  
I've fallen for this metal  
And I love this handle

So it's over for all of you  
So it's over for all of you

Two round holes cut into this fabric  
And I will slide it over my head

I'll chase you for all hours  
I never see you make  
The effort to chase me  
Now your final place is this lake

Stare at me now, on your way down  
Stare at me now, on your way down  
Stare at me now, on your way down  
Stare at me
