Suddenly my screen goes blank  
Have they even tracked  
me through purposeful obscurity?

Someone has it out for me  
do I even ask  
what you left in dakota?

I see myself (Seeing is not believing)  
I've been here before (believing is willing to see)

You back into my life  
on a day in June  
I've gotten this far without you  
but on my screen is I love you  
is that all it takes?

Error: Please conduct restore  
System message 3: 23 insufficient memories  
Picture me still on the sand  
there is only you coaxing me to the ocean

I see myself (Seeing is not believing)  
I've been here before (believing is willing to see)

You back into my life  
on a day in June  
I've gotten this far without you  
but on my screen is I love you  
is that all it takes?

So nevermind what I said
