Now we ain't been together for a little while,
And no, we ain't used to the good thing
But I'm so different baby.

You've had enough of this mean
This what it seems,
It gets more confusing,
Baby I'm clean
You don't have to worry anymore.

Chorus:
We're on a level we cannot fall from
You were my vessel I'm out of control,
No control on you,
We start together, let's control the weather
I'm so in love you don't even know
I'm just on... with you and keep you low
Honestly you won't leave my sight.

When everything else fails I'm here
I'll be by your side girl every day, every night
And every night I hold you tight
You're my guardian angel,
So fly, so cute,
And you're the reason why my heart keeps beating
beating beating

Chorus:
We're on a level we cannot fall from
You were my vessel I'm out of control,
No control on you,
We start together, let's control the weather
I'm so in love you don't even know
I'm just on... with you and keep you low
Honestly you won't leave my sight
