Father are you there  
Father help me out  
Father I am scared  
I can't find the feeling  
The something I believe in

I can't feel my tongue  
I can't tell the taste  
Something stole my lungs  
I am barely breathing  
The love I felt is leaving

But something says hold on  
You should stand the fight  
You will overcome  
It's just a matter of time

If you have a dream  
If you truly believe  
Life will turn you way  
And you will become  
Whatever you say

You don't need a hand  
To guide you through the space  
To make you touch the sky  
To make you reach that place

If you truly believe  
Life will turn your way  
And you will become  
Whatever you say
