Say you want to be a rolling stone  
Get your sail out in the wind  
Get out on the highway and let her roll on  
Roll on back to someplace you ain't never been  
Hey, hey

When I was younger I was hard to hold  
Seem like as I was always goin'  
Which ever way the wind would blow  
Now that travelin' feelin's got me back again  
Callin' me back to where it all begins

Moon rise and sun go down  
Turn my whole world around  
Little star up in the sky  
Tell my sweet baby, "Please don't cry"

Moon rise and sun go down  
Turn my whole world around  
Little star up in the sky  
Tell my sweet baby, "Please don't cry"

Travel out across the burnin' sand  
Across the ocean to some distant land  
We'll reach the end, we'll all be singin' and we'll all be  
friends  
Back where it all begins, back where it all begins
