"Can You Fool"

Visit "[Can You Fool](#)" on MotoLyrics.com

Well you can take all of the money that you made and
put it in the jar
Drag out a map that will show you, is Heaven very far?
You take all of the medicine you need 'til ya find out
who you are
Maybe you can figure why that woman wanna be so
cruel
But ya, ya just can't forget her, can you fool?

Well those winter nights and the city lights and the
crying of the train
Everyday is a shade of gray, every memory's a fade
And then ya finally use the sense God gave ya to come
out of the rain
Still you can't figure why that man is got to be so cruel
But ya just can't forget him, can you fool?

Oh, love is long and love is hard
Love brings lots of pain
She was here, now she's gone
Lord, bring her back again

Well you can take all of the money that you made and
put it in the jar
Drag out a map that will show you, is Heaven very far?
And you can take all of the medicine you need 'til ya
find out who you are
Still you can't figure why that man he got to be so cruel
But ya just can't forget him, can you fool?
No, you just can't forget her, can you fool?
Aww, can you fool?
