Weary eyed people spy
have you got my number
dancing through the turnstile
can you catch me with your silver tongue
forever divide, collect and find
the changing light has you
in its sight from where you are
its only time that you fear

Twist around the new one found
you feel like a hungry bear
every day actions sway
could you simplify if you tried
forever divide, collect and find
the changing light has you
in its sight from where you are
its only time that you fear
