She was a dream
Disappearing as quick
As she came into view
When I awoke to find
She was a dream
Tried to get myself back to sleep
To chase her shadow along the night
Keep this illusion alive
I felt that we'd met before
On another shore some other time
She was a love of mine
Ohh she was a dream
Thought that my ship had come in
Then I awoke to find
She was a dream
Every night I lay me down to sleep
I pray that I'll find her again
Though I know in my heart

She's a dream
She's a dream
When I think of that island day
The ocean spray the burning sand
It all seems so real
And if we ever meet again
Somewhere out there
I know just how I feel
She was a dream
Every night I lay me down to sleep
I pray that I'll find her again
Thought I know in my heart
She's a dream
She's a dream
Ohh, I know
She's a dream
Just my imagination running away with me
Ooh I don't even know her name
Ooh gonna find her - gotta find her
She's a Dream
She's a Dream
