In this place our time, how it's been forever
So we set ourselves aside, with our eyes left tender
Now turn your ears to the trumpets as they play tonight
The sound of horns is their trigger

I can't take this any longer
Waiting without an answer
You left me hoping with a faith
Let's get this process faster

Deliberation, take the innocence away
Is this battle being won, why are we here?
We're wasting our time

Bones dry, desiccating throughout history
War and war, humans die, for pride or just as human
greed

I can't be part of this mess
I can't be part of this wreck

Now turn your ears to the trumpets as they play tonight
The sound of horns is their trigger for manipulation
