You request pollard and you get pollard
You ask for pollard and you get pollard
You plead for pollard and you get pollard
You get down for pollard and you get pollard
You get down for pollard and you get pollard
You get down on your knees for pollard
And you get pollard
You get down on your knees and you get pollard

Cos you request pollard when you get pollard
And you ask for pollard and you get pollard
You plead for pollard and you get pollard
You get down for pollard and you get pollard
You get down for pollard and you get pollard
You get down on your knees for pollard
You get down on your knees for pollard
And you get pollard
