"Hold Me"

Visit "[Hold Me](#)" on MotoLyrics.com

If my hearts not too late for a piece of your time
There's been so many days since your eyes looked at
mine
In the dark of this room where the burnin' has grown
You believe in your love when you're lost and alone
And life don't give no reasons when the love goes away
No answers for someone like you

Hold me hold me
Seems like we never get together anymore
Hold me hold me
Starry nights don't come enough
That's what we came here for
Hold me

I will lay by your side
I can warm your cold nights
You can play in my dreams till I'm out of your sight
In the morning my love couldn't change where you go
You were always my women
It's the one truth I know
So hold out when there's no chance for your love
anyway
No diamond could shine close to you

Hold me hold me
Seems like we never get together anymore
Hold me hold me
Starry nights don't come enough
That's what we came here for
Hold me

(repeat chorus and fade)
