Hey there little girl , welcome to my world
I'll make your dreams come true
I own the stars above and mixed with a lot of love
That's what I'll give to you

I've got lots of charm, oh, running through my arms
To thrill you through and through
You won't be a lonely one , I'll make you the only one
That's what I'll give to you

All of the lovin' I have is yours to have and to hold
I got a love so strong , it's gonna last so long
Your love will never grow old

So I'll go where you go . Oh let me tell you so
I'll never make you blue
All these little things mixed with a diamond ring
That's what I'll give to you

All of the lovin' I have is yours to have and to hold
I got a love so strong , it's gonna last so long

(break)

So I'll go where you go , oh let me tell you so
I'll never make you blue
All these little things mixed with a diamond ring
That's what I'll give to you
That's what I'll give to you
That's what I'll give to you
That's what I'll give to you (fade)
