Wildflower

Sacrifice everything in a wonderland that you know
It's crazy that I'm clear out of my mind
A wonderful place to be

Wildflower

Sweet as the morning light
if I blink an eye will you go
I'm starting to care much more then I dare
A wonderful thing to see
And what do we know

First say you love me

And then say you leave me
But we never say goodbye
God you're an angel
But even an angel must choose
Someone will hurt you and when you stop running
There's only this love of mine

Wildflower

Sacrifice everything in a wonderland that you know
If older is wise
One look in your eyes
I'm younger then I should be
And only time
Waiting for you
to grow

First say you love me and then say you'll leave me

But we never say goodbye
God you're an angel
But only an angel must choose
Someone will hurt you and when you stop running
There's only this love of mine
