

## Porter Wagoner "Between Us"

Let's start by stopping long enough to talk things over  
Since there's a new love burning between us  
With openminded understanding between us  
Let's both feel free to talk of this new love  
Let there be no deep dark secrets between us let's  
never hide behind a false disguise  
Let there be no hidden feelings between us an honest  
love is a love that will survive

In our love let's share a friendship between us always  
close enough to talk things out  
Let's be honest with ourselves and with each other  
And our love will never know mistrust or doubt  
Let there be no deep dark secrets...  
An honest love is a love that will survive
