"Call It Love"

Visit "[Call It Love](#)" on MotoLyrics.com

I'm standing here, watching the waves break on the
sand, holding your hand, and wondering if there, was a
time

When i felt more comfortable, i could conquer the
world, with you by my side

We've gone down, so many lonely roads, searched for
what we'd known, was right around the corner
And i knew, from the time i saw your face, from our first
embrace, that you were the one

We could call it luck, we could call it fate
We could call it heart's, desire
We could call it a dream, even though we're wide awake
Let's just call it love

And i feel like, i've known you, my whole life
That every day and night, was made just for us
I don't know, what i ever did before
You walked through my door, and changed my whole
life

We could call it luck, we could call it fate
We could call it heart's, desire
We could call it a dream, even though we're wide awake
Let's just call it love
Let's just call it love
I like, to call it, love
