[Music - MT Lyrics - JB]

There's a sacred city not far from here  
Where the Earth is bare and the sky is black  
Tormented souls are stricken with fear  
And the sinners all know there's no way back

Fly into the Pentagram  
There's a lot you'll want to see  
Sacrifice the crying ram  
And drink the blood with me

Giant kingdom down below  
Where the lord of darkness sits and waits  
For a poor lost mortal to come in  
When he lowers down his gates

Prison of death where time stands still  
Forever life of pain  
Walking dead assault and kill  
The people will be slain

[Solos: Larry, Mike]

There's a sacred city not far from here  
Where the Earth is bare and the sky is black  
Tormented souls are stricken with fear  
And the sinners all know there's no way back

Giant kingdom down below  
Where the lord of darkness sits and waits  
For a poor lost mortal to come in  
When he lowers down his gates

You can't escape your destiny  
So take my hand and fly  
To an evil land of fantasy  
Inside of Satan's eye
