Understanding nothing can be so comforting  
But understanding you is like biology  
You lay there on the bathroom floor  
I hold you in my hand and don't be shy

When you pick it up and stab it I start to bleed  
You know what to do

Well, I feel like a scientist until I'm out of breath  
Well, I'm good with part and get away, it's what I need,  
hey  
When you got everything you've got nothing  
And when you got nothing you've got it all

And marry me baby, and sleep with me baby  
We'll sleep with the lights on and we'll sleep with our  
clothes on

And marry me baby, and sleep with me baby  
We'll sleep with our clothes on and we'll sleep with the  
lights on  
Just marry me baby
