Take me anywhere
Take me far from here
Where gunshots catch us
Take me anywhere
Take me far from this film
The bombshells explode us
Did I conjure this?

Take me anywhere
With you
With you
That's what I want
That's what I want
That's what I want

It came into my blood through my veins
It came into my world through my heart, my heart
It came into my bones through my brain
And it ruined us
It ruined us

I start to escape
So why do I feel so still
Rolling down the hill
My head over my heels
If we can't face them
How can we erase them
I'm rolling down the hill
My head under my heels
This fear will drive us faster, faster
I'm rolling down the hill
I know there's life to keep
Take me there faster, faster

It came into my blood through my veins
It came into my world through my heart, my heart
It came into my bones through my brain
And it ruined us
It ruined us
