Dreamer

Verse

I've dreamed it all
The good life
A couple cars a house a good wife
A few kids laughing running around
But the icing on the cake is
Looking into your eyes

In the morning when I wake up
From a carousel holds the make up
Of all the things that my heart desires and I've had
it all Before I open my eyes.

Chorus

They say I'm lost cause I'm a dreamer
But my vision extends beyond the future
Everything I want is in my reach
But I need some one to come and dream with me
I can't help that I'm a dreamer
Cause I, see so much of my future with you
Everything we want is in our reach
Sweetheart come lay right here and dream with me.

Verse

They say when you dream, dream big
Over the mountains and stars and then you'll live
You got to believe, spend the time
Every second every hour is a grind

And I'm going to grind, I'm still grinding
To have you here it was just like perfect timing
It takes it all blood sweat and tears
The courage to stand up and face all your fears

Do you have a dream then tell me what it is
They say your closer every step you take to it
What I imagine is so real
Close your eyes tell me how your dream feels.

Chorus

They say I'm lost cause I'm a dreamer
But my vision extends beyond the future
Everything I want is in my reach
But I need some one to come and dream with me
I can't help that I'm a dreamer
Cause I, see so much of my future with you
Everything we want is in our reach
Sweetheart come lay right here and dream with me.

Bridge

I have a dream that will last longer than, the both of us
I'm talking kids grand kids great grands from the
both of us
Dreams have a strength in numbers
Let's dream together so we'll never wonder
Where we going, cause in the end be both dreamed
where we were to be.

Chorus

They say I'm lost cause I'm a dreamer
But my vision extends beyond the future
Everything I want is in my reach
But I need some one to come and dream with me
I can't help that I'm a dreamer
Cause I, see so much of my future with you
Everything we want is in our reach
Sweetheart come lay right here and dream with me.

They say I'm lost cause I'm a dreamer
But my vision extends beyond the future
Everything I want is in my reach
But I need some one to come and dream with me
