"Love Your Way"

Visit "[Love Your Way](#)" on MotoLyrics.com

Got to keep moving to stay warm, 'cause I'm freezing
in this room

And if I prove no good here I'll skip to where I should
It's only an imaginary vigil that we keep
You salvage what you need I'll take the love you leave

I love your way, but I can't explain
What made me change

Wading in deeper ever deeper as I go
I drown the whole idea as I drift away from you
It's only an imaginary vigil that we keep
You salvage what you need I'll take the love you leave

I love your way, I can't explain
What made me change
I love your way

And as the memory gathers dust, buried in its crust
Are the remains of what we've done and the seeds of
what we just begun
The tapping of the rain beats a corrugated drum
And the city glow well it pulses on to the city hum

And as the memory gathers dust, buried in its crust
Are the remains of what we've done and the seeds of
what we just begun
The tapping of the rain beats a corrugated drum
And the city glow well it pulses on to the day is done

I love your way, I can't explain
What made me change
