Ya got feet but I seem so well, hell,  
Cause with fire, I can't retire to a shell  
You hear what I tell, didja hear what I tell  
You gotta bring him through ya finger, exhale

Take me sooner so there ain't no doubt  
That the heavier sleeper sleeps without  
An angel to justify your dreamin'  
Before you settle down, because you must be seein'

The many, the mirror  
Well check it out, superhero  
The fear of life and your ass is  
What's gettin' nearer (yeah)

Ask yourself who and you ask yourself why  
Look yourself in the eye

It ain't where you're from, it ain't where ya at  
It's what ya do and what ya gotta do is the the fact of  
the matter  
My tounge is my life, so I chatter  
You're scarin' yourself and so you scatter

Rain that sat right out on the bed just with  
Did he learn, just might this ever end  
Tryin' to find a crumpet  
You're wonderin' why you're not it

Actions speak louder than words, so they're nonstop  
Drop to your knees, you gotta minute to play,  
A second to die  
Fortify yourself and you fortify the lie

Ask yourself who and you ask yourself why  
Look yourself in the eye

In the eye, in the eye  
Look yourself in the eye  
In the eye, in the eye  
To what, the where, the who, the how, the whens, and  
the whys

In the eye, in the eye  
Look yourself in the eye  
In the eye, in the eye

(Yeah, yeah, yeah, check it out now)

You're like the land of the lost  
At what cost can you deal with it  
I suggest you get real with it

Look yourself in the eye, yeah, is it bloodshot  
Nearly believin' once it's not, are you not, are you not  
Afraid to look deeper, don't fear the reaper  
Wake up, wake up, wake up, when you're asleep

Walker, shit-talker, I know you're feelings are deep  
'Cause you fear the night stalker  
In the E-Y-E, see clearly  
Kiss your own cheek, 'cause I don't want you near me  
And I see right through ya, yeah, and this is gonna do  
enough

In the eye, in the eye  
Look yourself in the eye  
In the eye, in the eye  
To what, the where, the who, the how, the whens, and  
the whys  
In the eye, in the eye  
Look yourself in the eye  
In the eye, in the eye  
To what, the where, the who, the how, the whens, and  
the whys

(In the eye, in the eye)  
(Check it out, check it out, in the eye, in the eye)  
(In the eye, in the eye)  
(Yeah, yeah, yeah, yeah, in the eye, in the eye)

C'mon!
