Yeah I know everywhere I go someone's gone before  
Yeah it's true everything I do you have done it too

But I've never done this before  
I'm overwhelmed with every single chord  
I'm still surprised when everything rhymes  
A new shooting star on the rise

You think I am a clever guy with a clever mind  
But I'm afraid everything I say has already been said

But you've never heard it before  
You're overwhelmed with every single chord  
You're still surprised when everything rhymes  
A new shooting star on the rise
