The memories in my head
Are the ones that make my day
The night I try to sleep
Is like a dream I wanna be
Two pillows in my bed
One pillow I hold tight

Construct me and make me go on
You with me, we become one
My heart next to yours belongs
I want you, I need you bad

The thinking of my day
Is about how you are
Emotions running thru
I care so much about you
I have my coffee and
I drink it like we used to

Construct me and make me go on
You with me, we become one
My heart next to yours belongs
I want you, I need you bad

Desires never sleep, I feel the same
Like the first day

Construct me and make me go on
You with me, we become one
My heart next to yours belongs
I want you, I need your love
