We've got a secret only you and I know
We've got a language only we can speak
I want you to be wherever I go
It keeps getting better every time we met
I feel it deep inside it can't be denied, oh

Refrain:

I knew the first time when we were together
I was born to love you forever
Nothing comes between us
No one will ever Baby; I was Born to love you forever

I feel in my heart that it's destiny
Can tell when we kiss and by the way we touch
I'm made for you, you're meant for me
I never dreamed that I could feel this much
I feel it deep inside it can't be denied, oh

Refrain:

I knew the first time when we were together
I was born to love you forever
Nothing comes between us
No one will ever Baby; I was Born to love you forever

Because we're young, I know they doubt us
But they don't know the first thing about us
We close our eyes when we kiss
Let's never lose our innocence

I feel it deep inside it can't be denied, oh

Refrain:

I knew the first time when we were together
I was born to love you forever
Nothing comes between us
No one will ever Baby; I was Born to love you forever

I was Born to love you forever
