And this one is for all of those  
Who think they can't shine  
For everyone who says  
"I can't even die"  
For all of those who only hears  
"You are worthless"  
This is for them  
Our words of truth

You're first against the wall  
But don't think you're last  
We will color these bricks  
With everything we hate  
And you will frame

We got our toes on the edge  
Step back, we won't let 'em win  
Bring your head to the surface  
They're on thin fucking ice  
They wanna smash  
Every nail that sticks out  
Hide the hammers  
We are the nails

You're first against the wall  
But don't think you're last  
We will color these bricks  
With everything we hate  
And you will frame
