You
Came to me from distant space
Foreign for the human race,
Full of mysteries and charms.

You
Turned my notions upside down.
Now my feet don't touch the ground.
Let me fall into your arms.

This love is more than a feeling.
I knew it from the beginning.
We have so much to discover,
My inconceivable lover.

I
Need you more than I can say.
Take me to the Milky Way.
You should know – my heart is yours.

I
See my future life so clear.
Take my hand, let's disappear.
Sliding through the Universe.

This love is more than a feeling... (repeat refrain)

I...
I was born to stay with you.
So,
Do you feel the same way too?
