"Cars"

Visit "[Cars](#)" on MotoLyrics.com

Accidentally found out what you're all about
I was happy 'til now but there's always a doubt
That I get when I think everything's going well
But still we might not have met

I think you detached
From our last shouting match
Oh but still I am arguing most with myself
What else is new

Cars around the corner are taking the lead
And I can't find it in me to take what I need
The last one outside will be trying to get in and get
everything that you have

Oh I think you were lucky for being naive
Cause I've seen my future in the path that you leave
While you're killing the messenger because he's me
You'll see but you won't believe

Cars around the corner are taking the lead
And I can't find it in me to take what I need
The last one outside will be trying to get in and get
everything that you have

Cars around the corner are taking the lead
And I can't find it in me to lay where I bleed
The last one outside will be trying to get in and get
everything that you have

I'm trying to get in and get everything that you have
I'll keep trying to get in and get everything that you
have
