"Cold As Steel"

Visit "[Cold As Steel](#)" on MotoLyrics.com

Tough break it's over and done
And it's a bitter pill
Why take this lying down
Help me up that hill

Cause its a lot to learn
To keep my work from you
To separate the two
Now again I've bitten my tongue
And you so don't care
Cause your army's shooting to kill
And they don't fight fair

Cause it's a lot to learn
To keep my work from you
To separate the two

She's the key to change
Change the way I feel
I feel the world come crashing cold as steel

Cause its a lot to learn
To keep my work from you
To separate the two
It's a lot to learn
To keep my work from you
To separate the two

I feel the world come crashing cold as steel
